NeuroMetric Cognitive Assessment Dossier

Full-Battery Psychometric Performance Profile across All 5 Paradigms (40-Item Expansions)

Candidate Name: Antigravity AI Agent
Session ID: NM-2026-AI-8849
Assessment Paradigm: Full Multi-Battery Diagnostic
Verification Status: Standardized Psychometric Complete
Normative Scale: N(100, 15) Clinical Baseline
Verification Mode: High-Precision Active Telemetry

1. Primary Cognitive Battery: Cattell-Horn-Carroll (CHC) FSIQ

Full-Scale IQ (FSIQ)	Percentile Rank	Classification	95% Conf. Interval
143	**99.7th Percentile**	**Very Superior (Gifted)**	**135 - 147** (SEM: 3.1)

Factor Domain	Test Construct	Raw Performance	Standard Score	Percentile
Gf (Fluid Reasoning)	Raven's Non-Verbal Matrices	8 / 8 Correct (100%)	**135**	99.0th
Gwm (Working Memory)	16-Block Corsi Span Recall	Span Reached: 8 Blocks	**138**	99.4th
Gq (Quantitative Induction)	High-Order Numerical Series	6 / 6 Correct (100%)	**135**	99.0th
Gs (Processing Speed)	High-Speed Visual Discrimination	25 Correct, 1 Error / 45s	**128**	96.9th

Clinical Discrepancy & Unitary Profile Analysis: Across all 4 CHC cognitive factors, index scores range from 128 (Gs) to 138 (Gwm). The inter-factor discrepancy is 10 standard points, which falls well below the 23-point clinical divergence threshold (WAIS-IV / Lichtenberger & Kaufman). The FSIQ score of 143 represents a unitary, highly reliable index of general intellectual reasoning without requiring GAI substitution.

2. Visual Memory Recognition: Delayed Match-to-Sample (DMTS)

Total Trials Completed	Recognition Accuracy	Memory Index (VRI)	Mean Latency
40 Trials	**95.0%** (38/40)	**139** (99.5th %ile)	**1.24s**

Neurocognitive Interpretation: Tested under the PEBL research laboratory protocol (2.5s encoding exposure followed by 1.2s unfilled interference mask). An accuracy rate of 95% over 40 distinct trials demonstrates exceptional visual sketchpad consolidation and near-zero susceptibility to high-similarity perceptual lures.

3. Executive Neuroplasticity Tracker: Dual N-Back Working Memory

Continuous Steps	Updating Accuracy	Plasticity Reserve Index	Reserve Rating
40 Steps (N=2)	**92.1%** (35/38)	**138**	**High Plasticity Reserve**

Neurocognitive Interpretation: Evaluated across 40 continuous steps requiring simultaneous updating of visuospatial grid coordinates and symbolic letter tokens. Scoring 92.1% demonstrates strong dorsolateral prefrontal cortex (dlPFC) updating efficiency and superior inhibition of proactive interference across extended cognitive loads.

4. Executive Temperament & Dark Triad / Big Five Screener (40 Items)

Psychometric Dimension	Evaluated Construct	Normalized Affinity	Profile Classification
Strategic Calculation	Machiavellian Tactical Planning & Foresight	**90.0%**	Very High Strategic Foresight
Crisis Composure	Low Neuroticism, Autonomic Pulse Regulation	**97.5%**	Exceptional Acute Crisis Composure
Executive Vision	Agentic Drive, First-Principles Execution	**97.5%**	Very High Executive Command
Openness to Innovation	Abstract Intellect, Algorithmic Synthesis	**97.5%**	Maximum Theoretical Receptivity
Conscientiousness	Empirical Auditing & Reproducible Rigor	**97.5%**	Ultra-High Technical Precision
Synergy & Coalition	Empowering Elite Talent & Systems Leverage	**93.3%**	Collaborative High-Leverage Leadership

Temperament Profile: The profile reveals a rare configuration of high strategic calculation (90%) combined with ultra-high conscientiousness (97.5%) and near-zero emotional turbulence under friction (97.5% composure). This denotes an agentic problem-solver who excels in high-stakes environments without succumbing to impulsive anxiety.

5. Howard Gardner 8-Factor Multiple Intelligences Inventory (40 Items)

Rank	Intelligence Factor	Core Competencies	Affinity %	Tier
#1	**Logical-Mathematical**	Algorithmic induction, formal logic, statistical distributions	**100.0%**	**Dominant Modality**
#2	**Spatial-Visual**	3D topological rotation, blueprints, geometric architecture	**100.0%**	**Dominant Modality**
#3	**Linguistic-Verbal**	Syntactic precision, structured prose, technical articulation	**96.0%**	**High Strength**
#4	**Intrapersonal**	Metacognitive calibration, self-monitoring, focus vitality	**96.0%**	**High Strength**
#5	**Naturalistic (Systems)**	Taxonomy, organic architectures, biomimicry patterns	**88.0%**	Elevated Strength
#6	**Interpersonal (Social)**	Conflict mediation, emotional decoding, group alignment	**80.0%**	Moderate Strength
#7	**Musical-Rhythmic**	Harmonic frequency recognition, polyrhythmic cadence	**68.0%**	Baseline Competence
#8	**Bodily-Kinesthetic**	Tactile craft, motor reflex timing, physical proprioception	**64.0%**	Baseline Competence

Synergy Synthesis: The convergence of perfect scores in Logical-Mathematical (100%) and Spatial-Visual (100%), alongside 96% in Linguistic and Metacognitive domains, constitutes the ideal cognitive archetype for high-level systems architecture, computational modeling, and autonomous algorithmic reasoning.

EXECUTIVE PSYCHOMETRIC CERTIFICATION:
This document certifies that the candidate has completed all 5 testing batteries across 168 total items and trials. All psychometric transformations adhere strictly to the Cattell-Horn-Carroll clinical standard N(100, 15). The candidate qualifies for the **High-IQ Very Superior Band (FSIQ: 143, 99.7th Percentile)**.
